Wilderness

Mother Nature truly puts on a show in Alaska. Massive open spaces, ancient forests, soaring mountains and salmon-filled rivers create exceptionally rugged, untamed beauty. Alaska has more than 57 million acres of wilderness: watersheds, mountain ranges, glaciers, wetlands, coastlines, volcanoes, tundra, and forests. It's home to eight national parks, 100,000 glaciers, and more than 98 percent of the United States' brown bear population.

Wildlife

Pristine environmental conditions make Alaska well known for its abundant wildlife. Alaska's parks provide you with up-close experiences with wildlife unlike anywhere else in the country. Getting to see a majestic brown bear snatching salmon from an Alaska stream is the memory of a lifetime. But as iconic as these massive land predators are, they're just the start of what Alaska has to offer. Keep your eyes open for bald eagles, black bears, caribou, humpback whales, orcas, and, of course, moose.

Mountains

With thirty different mountain ranges and the top ten tallest peaks in North America, Alaska is a land of spectacular peaks and valleys. The Alaska Range reaches from the coastline to the interior regions and includes Denali, its showpiece mountain. At 20,320 feet, Denali is North America's highest peak. The mountain known as the Great One towers over the surrounding Alaska Range. The view on a clear day is an intensely impressive sight.

Denali

Denali National Park is home to Denali, the majestic 20,310-ft. High Mountain formerly known as Mount McKinley and the tallest peak in North America. Spanning six million acres, the park's terrain of tundra, spruce forest, and glaciers make it the perfect place to spot the Big 5—grizzly bears, wolves, moose, caribou and Dall's sheep.
